Communication Plan

Student: Pravesh Singh **Project:** Electric Vehicle Market Performance & Insights
Date: 1 November 2026 **Team:** Individual Project

Communication strategy

This is an individual academic project. The student maintains a dated progress record and shares milestones, blockers, and feedback with the instructor/supervisor through the course-approved channel.

Communication plan

Activity	Frequency	Channel / evidence	Purpose
Progress review	At milestones	Project log and workbook	Track scope, progress, and remaining work.
Issue review	As needed	Notes and screenshots	Record dataset, chart, and publishing issues.
Milestone review	After dashboard completion	Published Tableau Public workbook	Confirm eight worksheets and two dashboards.
Demo rehearsal	Before submission	Live Tableau workbook	Test presentation sequence and dashboard navigation.

Challenges and resolutions

• Explain fields and aggregations used in each chart.

• Organize eight worksheets across two dashboards and use navigation buttons.

• Retain the packaged .twbx workbook and Tableau Public link.

• Use actual screenshots and verified links; do not claim tests that were not performed.

Current status: Tableau workbook published and packaged workbook saved. Add the verified Tableau Public URL and final screenshots before submission.
